LITTLE MONKEY
DESIGN · BUILD · PLAY

Welcome to our 2017/18 catalogue!

We have redesigned our catalogue format to make it quicker and easier to find exactly what you're after! Packed with over 4000 products; it is the most comprehensive range available.

You will be sure to find all the specialist door, gate and fencing accessories you will ever need, all in one place and from one friendly supplier.

We have been investing heavily in product development and we're excited to showcase over 350 new products; look out for the NEW tab as you browse!

Merchandising solutions – so much more than simply supply! For stockists of our branded products; Gatemate®, Fencemate®, Sitemate® and Patura®, we offer a wide range of supporting merchandise, including retail display stands to display in your shop!

World-class customer loyalty team – we're known nationwide for our unrivalled customer service standards. Our in-house customer loyalty team are friendly, helpful, and prepared to go the extra mile!

Quality product – we understand that you expect value for money; that's why we never compromise on the quality of our products!

Experience and knowledge – built on years of experience, we have the knowledge and experience to advise you, whatever your enquiry may be! Simply speak to one of our friendly team and they will be happy to help wherever they can.

No-quibble money back guarantee – as part of our commitment to serving you we have a no-quibble returns promise - now that's peace of mind!

No Quibbles

All our products are guaranteed to be robust, reliable and durable. Everything has been stringently vetted, and only the best products make it into our range. Our commitment to 100% customer satisfaction is backed up by a 90 day, no quibble, money-back guarantee on all our products.

Green Policy

We do all we can to minimise our environmental impact and to promote responsible environmental practice including sustainable agriculture and forestry management. This commitment is reflected through our production processes and includes energy efficiency, minimising packaging, water usage, waste disposal and air emissions.

NEW

Finishes

Galvanised

A 'hot-dip' or 'spelter' galvanised finish approximately 60 microns thick. The product is dipped in molten zinc, resulting in a thick, rough coating that has high corrosion resistance.

Zinc Plated/YP

These products have a zinc plated finish with an additional yellow passivating treatment. This extra layer increases the corrosion resistance and gives the product a light yellow appearance.

Zinc Plated

These products have been finished with a process of electroplating zinc onto steel, resulting in a shiny finish about 6-8 microns thick. Although Zinc plated products are typically cheaper than Galvanised ones, they usually rust more easily due to the thinner coating.

Self Colour

Unfinished steel. These products are typically used in fabrication, and will naturally rust very quickly – this should be removed prior to galvanisation.

Pre-Galvanised

These products are fabricated from sheet steel that has already been galvanised, giving a finish approximately 20 microns thick. The resulting corrosion resistance is between that of hot-dip galvanising and zinc plating.

Premium Black

A hot-dip galvanised finish with a black polyester powder coating on top. This double layer results in a high level of corrosion resistance and attractive, smooth appearance.

Epoxy Black/ Epoxy Brown

Polyester powder coating is baked or sprayed onto the raw metal, resulting in a smooth finish. Medium corrosion resistance, however on moving parts the finish can flake off, meaning the steel will corrode more easily.

Stainless Steel

Stainless steel is an iron alloy with a high level of chromium, giving it an external layer that is virtually rust free. Our premium stainless steel products are made from grade 316 stainless steel, which is a marine grade stainless steel for ultimate corrosion resistance! Ideal for coastal and other high-moisture areas.

Ruspert

Ruspert is a rustproof treatment technology with superior corrosion resistance. An organic coating containing aluminium flakes and special rustproof paint passivates the metallic layer chemically, prevents intrusion of corrosive factors from outside and controls the self-sacrificial galvanic effect of zinc. Our high performance screws, decking screws and hex head timber screws all have a ruspert finish for ultimate performance and longevity.

Pewter

Zinc coating is applied, followed by a pewter finish and a clear lacquer to achieve this beautiful finish. Pewter finish highlights the texture of the steel attractively, however pewter products will need regular wiping with an oily cloth to keep them in good condition.

GATEMATE®

SUPERIOR GATE FURNITURE

The Gatemate Concept

The Gatemate concept is simple; a range of premium quality hardware pre-packed with fixings and fitting instructions in eye-catching packaging, displayed on stunning Gatemate branded merchandisers for maximum effect.

Effective point of sale displays are proven to boost impulse sales and drive profitability – that's why the Gatemate concept works!

Quality is guaranteed

We never compromise on the quality of our products - that means that you can have peace of mind in every product you sell!

If you're not happy with a product for any reason, you can return it within 90 days for a full refund!

Gatemate Merchandising Solutions

Since 1999 we've been pioneers in point-of-sale merchandising displays.

As part of our ongoing commitment to and investment in our stockists, we offer a range of merchandising solutions free of charge with your initial stock order of Gatemate products! Our dedicated merchandising team will look after your install from erecting the merchandisers to filling them with stock in the best way to ensure you achieve the most sales you can.

We don't stop there either. Our dedicated merchandising team periodically visit our stockists to clean up your merchandisers and ensure they are in tip-top condition! That's because we recognise that when kept looking great and well stocked, our merchandisers are the most effective way for you to increase both your sales and your profitability. That's a win-win!

Speak to your account manager today to find out what we can do for you!

Further Marketing Support

We offer a wide range of free marketing support material for our stockists to use. From the Gatemate complete product guide to external posters and banners, there's a complete range of additional material to compliment your Gatemate display.

HIGH PERFORMANCE COMPOSITE HINGES

Our safety gate hinges are injection-moulded from super strong glass-fibre reinforced materials for many years of reliable and rust-free performance. The unique, spring-loaded adjuster allows tension to be quickly adjusted for gates of different sizes and weights using only a screwdriver.

GATEMATE STANDARD UNSPRUNG GATE HINGES

FENCEMATE®

SUPERIOR FENCING ACCESSORIES

The Fencemate Concept

The Fencemate collection is a range of high quality fencing and decking accessories, from decorative rope and fittings to rapid set post concrete.

Smaller Fencemate products such as the decorative rope and fence post finials can be displayed on our purpose built Fencemate merchandisers. Effective point of sale displays are proven to boost impulse sales and drive profitability – that's why the Fencemate concept works!

Quality is guaranteed

We never compromise on the quality of our products - that means that you can have peace of mind in every product you sell!

If you're not happy with a product for any reason, you can return it within 90 days for a full refund!

Fencemate Merchandising Solutions

Since 1999 we've been pioneers in point-of-sale merchandising displays.

As part of our ongoing commitment to and investment in our stockists, we offer a range of merchandising solutions **free of charge** with your initial stock order of Fencemate products! Our dedicated merchandising team will look after your install from erecting the merchandisers to filling them with stock in the best way to ensure you achieve the most sales you can.

We don't stop there either. Our dedicated merchandising team periodically visit our stockists to clean up your merchandisers and ensure they are in tip-top condition! That's because we recognise that when kept looking great and well stocked, our merchandisers are the most effective way for you to increase both your sales and your profitability. That's a win-win!

Speak to your account manager today to find out what we can do for you

Further Marketing Support

We offer a wide range of free marketing support material for our stockists to use. Ranging from the Fencemate complete product guide to external posters and banners, there's a comprehensive range of additional material to compliment your Fencemate displays.

POST SUPPORT SYSTEMS

FENCEMATE SWIFT CLAMP DRIVE IN POST SUPPORT

These supports are suitable for most ground conditions and the wide range of sizes fits all common timber posts. Robust construction ensures they will drive into very hard ground with ease and the effective clamp system holds the post securely in the socket.

Suitable for fence posts, decking, pergolas, gazebos, carports, bird tables and much more.

FENCEMATE SWIFT CLAMP BOLT DOWN POST SUPPORT

These supports are designed for fixing posts to any hard surface that will accept fixings such as concrete bases, timber decking or walls. Robust construction and the effective clamp system ensure posts are securely supported. Available with flush sides (see below) for fixing directly next to a vertical surface.

Suitable for fencing, decking, car ports and fixing to walls. Domestic and light commercial use only.

Designed for fixing posts directly next to a vertical surface, such as a wall. The effective clamp system holds post securely in the socket.

FENCEMATE SWIFT CLAMP CONCRETE IN POST SUPPORT

This support is designed for use where conditions prevent the use of the drive in post support such as very stoney or loose ground or areas of hardstanding. The effective clamp system will hold the post securely in the socket. Suitable for fencing, decking and carports.

FENCEMATE SWIFT CLAMP REPAIR SPUR

This support makes light work of replacing a rotten timber post in a sound concrete base. The repair spur drives between the old timber and the concrete base to provide a secure post support without the need to disturb the concrete base. The effective clamp system ensures posts are securely held in the socket.

MODULAR STEEL RAILING SYSTEM

Steel modular railing panels for decking and balconies

Our steel modular railing panel is a pre-welded and enhanced version of traditional steel railing that brings unparalleled quality to any patio, deck or balcony. It provides a clean, classic appearance that is versatile for a variety of applications and surfaces. Pre-galvanized steel, zinc phosphate, DuPont® e-coat and DuPont® premium powder coating make it the most elegant and durable steel railing system on the market.

- 6' & 8' pre-welded sections (1" rail, 5/8" pickets)
- Unique adjustable railing panel that suits any steps or stairway
- Pre-galvanized, zinc phosphate, DuPont® e-coat and DuPont® powder coated steel
- Strongest and most attractive steel railing system on the market
- Peace of mind with a 15 year manufacturer warranty!
- Our steel modular railing panel is virtually maintenance free, which translates into more time enjoying your railing and less time maintaining it! With the ability to resist effects of weathering, our modular steel railing is coated with a specialized mixture that encompasses a premium powder coating loaded with UV inhibitors and a heavy zinc galvanisation treatment.
- The modular design allows an installer to complete the project without prior visits to site, saving days and wasted journeys

The Sitemate Concept

Sitemate is an ever-expanding range of tools and fixings.

Developed particularly for the fencing trade, our tools are built to last, because we know that they need to be tough enough for whatever gets thrown at them. Likewise our fixings are manufactured to only the highest standard to ensure that they perform to demanding expectations.

Sitemate Merchandising Solutions

As part of our ongoing commitment to and investment in our stockists, we offer Sitemate branded merchandisers free of charge with your initial stock order of Sitemate products! Our dedicated merchandising team will look after your install from erecting the merchandisers to filling them with stock in the best way to ensure you achieve the most sales you can.

Speak to your account manager today to find out what we can do for you!

Further Marketing Support

As a further part of our commitment to our stockists, we offer a range of free marketing and display material to complement our branded merchandise and displays. For example, the Sitemate PVC banners are a great, eye-catching way to draw customers into your shop!

Speak to your account manager today to find out the full range of marketing support material available to you!

DESIGN · BUILD · PLAY

PLAY EQUIPMENT LISTED IN THIS SECTION IS FOR DOMESTIC USE ONLY. IF YOU HAVE AN ENQUIRY FOR COMMERCIAL PLAY EQUIPMENT, PLEASE CONTACT ONE OF OUR SALES TEAM.

DESIGN... BUILD...PLAY!

PREMIUM QUALITY...

Little Monkey play towers are built from premium slow-grown European heartwood, with high quality fixings and accessories creating the sturdy, durable, safe climbing frame of your child's dreams!

EASY TO ASSEMBLE...

Our play towers are delivered partly assembled with pre-cut timber for ease of construction; every kit comes with easy to follow instructions so they are straightforward and simple to build.

THREE SIMPLE STEPS...

As easy as 1...2...3! Choose your play tower, build on more fun and add some imagination! All Little Monkey play towers are highly customisable so you can create your unique play experience!

ALTERNATIVELY, PURCHASE A COMPLETE KIT!

With each pictured kit, we have included a list of product codes for easy ordering. When ordering, simply quote these codes to create the play tower you see.

DESIGN • BUILD • PLAY

Important note: when ordering, timber kits and fixing kits have separate codes which must both be quoted to create your Little Monkey play tower.

PLAY
EQUIPMENT

3 EASY STEPS

AS EASY AS 1...2...3!

CHOOSE YOUR PLAY TOWER...

Choose your play tower, or why not put two together! Four Little Monkey play towers to choose from – predrilled partly assembled wood kits along with high quality fixing kits for easy assembly.

1

2

...BUILD ON MORE FUN!

Choose your structural extras, build on hours of enjoyment! Ramps, walls, climbers and slides...

3

...ADD SOME IMAGINATION!

Select accessories to get the monkey's imagination running wild! Swings, flags, telescopes, telephone, blackboard, pirate ship, basketball net and more to create your unique fun!

Patura Electric Fencing

...ONE OF THE BEST ELECTRIC FENCING SYSTEMS IN THE WORLD...

When you invest in electric fencing, you'll want to be sure you can depend on it, without question, without fail - whether it's to keep animals in or to keep them out!

Already the "system of choice" across Continental Europe, Patura is a respected brand with an enviable reputation for practical, efficient yet innovative products.

Combining the latest technologies and materials with guaranteed quality, reliability and durability, plus German attention to detail from the acknowledged experts in electric fencing.

Patura won't let you down, guaranteed.

GOLD STAMP OF QUALITY

Patura is a German manufacturer of a quality product with outstanding strength and durability.

*Terms and conditions apply, for more information please contact your supplier.

5-YEAR WARRANTY

All Patura products are manufactured to the highest industry standards and this is backed by a no-quibble guarantee policy. All energisers have a 3-year warranty* and some insulators have a 10-year warranty.

PATURA HAS A COMPLETE RANGE FOR EVERY NEED

BASIC INFORMATION ON ELECTRIC FENCING

THE ELECTRIC FENCE CIRCUIT EXPLAINED

THE ENERGISER (POWER SOURCE)

An efficient energiser is the foundation of the basic power supply to your electric fence. The output power of an energiser is specified in joules.

Four factors play a crucial role when deciding which energiser to use:

- ① Vegetation load on the fence
- ② Fence length and conductivity of the wire used
- ③ Type of animal
- ④ Whether a permanent or temporary (moveable) system is required

You will find detailed advice regarding the selection of an energiser in the tables for the particular energisers.

SUMMARY

Minimum power requirement depends on fence length and vegetation level:

- Up to 500 m no vegetation – min. 0.25 joules
- Up to 1000 m normal vegetation – min. 2.0 joules
- Up to 1000 m heavy vegetation – min. 6.0 joules

0.33 joules / 9 volts

0.63 joules / Solar 12 volts

0.05 joules / 3 volts

2 joules / 12 + 230 volts

CHOOSING THE RIGHT ENERGISER

In order to simplify the choice of an energiser in any particular circumstance, consider all the following factors.

VEGETATION (WEEDS ETC)

The decisive role in the selection of an energiser is determined by the effect of vegetation at the fence. The high output energy of the PATURA energisers is used primarily to destroy heavy vegetation at the fence and, despite this vegetation, to maintain a high voltage level at the fence. These are the various vegetation conditions:

No vegetation – no contact between the vegetation and the fence wire

Normal vegetation – the vegetation is often touching the wire

Heavy vegetation – the wire runs completely in vegetation

Refer to charts on pages 274-279 for detail relating to the distances energisers will power.

FENCE LENGTH

After the vegetation, the length of the fence plays the next most important role in the selection of equipment. By fence length we mean not the total length of the individual wires added together, but simply the length of the actual fence itself. Multi-wire fences carry the current better than single strand ones, providing that the wires are connected to each other at regular intervals.

ANIMAL TYPE

The type of animal plays an important role in the selection. With animals that are difficult to contain, such as wild animals, sheep, goats and fowl, powerful equipment should be used. With more easily contained animals, such as cattle, horses, pigs and domestic animals, less powerful equipment is needed for the equivalent length of fencing.

For recommended maximum fence length please refer to the tables for the particular energisers.

Animals that are easy to contain

Animals that are difficult to contain

THE POWER SOURCE

Various power sources are available for powering energisers:

- 230 volts AC from the power outlet
- 12 volts DC from a rechargeable battery
- 12 volts DC from solar cells + battery
- 9 volts DC from non-rechargeable batteries

There are many reasons for choosing an energiser with a mains connection, should such a connection be available: the acquisition price of the energiser is relatively low, the energy costs are extremely low, and the ease of operation is very high. If there is no mains supply available, then the next best alternative is equipment with a 12 volt battery connection. The energy costs are still justifiable, but the maintenance requirement for the recharging of the batteries is nonetheless considerable. In

order to minimise this requirement – at least in the spring to autumn period – we recommend the use of solar panels, especially so with the more powerful 12 volt energisers.

The most expensive alternative for powering energisers is the use of 9 volt non-rechargeable dry batteries, which also have to be disposed as special waste when exhausted. The advantage with these energisers is that they are easy to use, but their low power is a disadvantage.

RECOMMENDED WIRE SPACINGS

Fence animals in...

In principle, containing animals is easier than excluding them. Animals that are contained, quickly get used to the fence and can be relied upon to respect it. In excluding animals, we have to consider that animals approaching the fence have no previous experience of it. In this case we need to ensure that initially the animal receives a strong and memorable electric shock, and adjusts itself to give the electric fence the necessary respect. Thus for exclusion fences, only especially powerful energisers should be used.

COWS

Electric fences for cows are 0.85 to 1.05 m high with 1 to 2 wires.

SHEEP

Electric fences for sheep require 3 or 4 highly conductive wires at the spaces shown. (The bottom wire is only necessary if lambs are being kept in)

ELECTRIC FENCES

Electric fences are suitable for containing or deterring just about all kinds of animal.

The fences differ only in their height, the number of wires and partly in the fence material.

Whether the fence is to be an outer fence or a subdivision also plays a role.

On these pages you will find the information on outer fence construction with respect to the quantity and height of wires for the most important types of animal.

For inner fences the heights can be selected as some 10 to 15 cm less, and one wire fewer can possibly be used.

We will be pleased to advise you on any electric fencing questions.

HORSES & PONIES

Electric fences for large horses are 1.30 to 1.60 m high with 2 to 3 conducting wires.

PIGS

Electric fences for pigs are 0.55 to 0.75 m high with 2 to 3 wires. Outer fences for domestic pigs should have a second fence to protect against wild animals.

...or keep wildlife out

EXCLUDING ROE-DEER

Electric fences for protecting against red deer are up to 1.50 m high with 5 wires.

THE ELECTRIC FENCE FOR EXCLUDING ANIMALS

As stated above, electric fences used for keeping animals out (excluding) require high power energisers. Also be sure to choose the right conductor as wires may be subject to extreme power loss (wires placed near to the ground or through woodland). The best product to use to withstand this requirement is aluminium wire featured on page 284.

EXCLUDING RABBITS

Electric fences for protecting against rabbits are approx. 0.55 m high with 3 wires. With rabbits, in order to prevent them digging under the fence, it may be necessary to lay an earthed wire directly on the ground. The fence should be slightly canted towards the animals.

INSTALLATION GUIDELINES

CATTLE FENCING

A Compact Reel can be hooked onto existing fencing if desired. Note: There is no electrical connection

BATTERY ENERGISERS

Battery powered energisers for use with 9V non-rechargeable 'dry-cell' batteries or 12V rechargeable 'wet-cell' batteries. Ideal for use in areas where mains power is not easily available.

PATURA 9V DRY-CELL BATTERY ENERGISER

REF	DESCRIPTION	JOULES	CODE
P20	Great value amongst Patura 9V dry-cell battery energisers; ideal for small cattle and horse pastures; user friendly switch; single indicator light.	0.22	P141220
P40	The all round Patura energiser for 9V dry-cell batteries; ideal for cattle and horse pastures with no or little vegetation; battery test, slow pulse sequence, night save mode; half/full power.	0.29	P141420
P60	Our most powerful energiser using 9V dry-cell batteries; high performance for effective animal control even under load conditions at the fence; battery test, slow mode, night safe mode, half/full power.	0.43	P141620
P15	Greatest value for money amongst Patura 9V energisers; ideal for small cattle and horse pastures; indicator for fence voltage and battery condition; waterproof, magnetic rotary switch.	0.20	P141100
P50	The powerful 9V energiser; ideal for cattle and horse fences even under load conditions on the fence; indicator for fence voltage and battery condition; waterproof, magnetic rotary switch.	0.39	P141500

LEAD ADAPTOR SET

DESCRIPTION	CODE
Adaptor set for connecting all Patura 9V dry-cell battery energisers to 12V battery or mains adaptor.	P159101

PATURA LOW POWERED BATTERY ENERGISERS

REF	DESCRIPTION	JOULES	CODE
P10	This handy little energiser is ideal for light duty work with horses and ponies. It is also suitable for pheasant release pens and for domestic work such as keeping cats out of gardens and herons from fish ponds. Powered by 2 x D-size 1.5V dry-cell batteries. Max fence length: 800m.	0.05	P140700
P30	Energiser using 4 x 1.5V internal batteries, size D or 12V battery; the ideal energiser for small horse paddocks, for trekking and for domestic animals.	0.16	P140800
P30+	As P30, but with addition of practical mounting post , which under good earth conditions doubles as an earth stake.	0.16	P140900

Only perfect earthing allows maximum power at the fence

CONNECTORS AND ALL LEADSETS

MULTI-VOLTAGE ENERGISERS FOR 230V + 12V

Energisers for use with either mains power or batteries. Energisers are supplied with stainless steel connectors and all leadsets.

PATURA MULTI-VOLTAGE ENERGISERS

REF	DESCRIPTION	JOULES	CODE
P5	The Patura multi-voltage energiser for electric fences for cattle, sheep and horses, also for longer fences with heavier vegetation; including 230V mains adaptor and 12V adaptor cable.	6.4	P147500
P4	The Patura multi-voltage energiser for longer fences with normal vegetation.	4.5	P147410
P3	The Patura multi-voltage energiser for electric fences with normal vegetation.	2.7	P147310
P2	The Patura multi-voltage energiser for short fences with light vegetation for cattle and horses.	1.4	P147210
P1	The Patura multi-voltage energiser for short fences with light vegetation and domestic animals.	0.7	P147110

Mounting to a fence: the energiser is directly attached to a fence post - The P1 is the ideal energiser for short temporary fences.

230 V connection (with mains adaptor): inside a building (without fire risk) or on an outside wall below a cover.

ACCESSIBLE CARRY BOX

Accessible Carry Box for easy transportation and installation of Patura Energisers. Ideal for a durable and stable system for an energiser with solar panel. Enough space to use with batteries up to 36cm in length.

DESCRIPTION

Large galvanised metal box. Suitable for use with all Patura 12V and Multi-Function Energisers (except P6000).

CODE

P900200

ATTENTION: Do not use an extension reel outdoors to connect the energiser to the mains system

Energisers for 230 + 12 volts

Only perfect earthing allows maximum power at the fence

PATURA energisers comply with all obligatory standards

THE PERFECT INSTALLATION OF YOUR PATURA MAINS ENERGISER

If you consider the following points you will have a long-term and reliable performance of your fences:

- 1 A suitable location to install your mains energiser is on the outside of the wall of a building close to a power outlet and under an adequate projecting roof.
- 2 If you want to install your energiser inside a building this is only permitted in buildings without fire hazard. Furthermore you have to install a lightning diverter before you insert a lead cable into the building.
- 3 From the fence terminal of the energiser you run a special high voltage cable to your fence.
- 4 If you wish you can install a cut-out switch in order to switch ON or OFF the power to different pastures.
- 5 From the earth terminal of the energiser you run the same high voltage cable to your earth system.
- 6 Install your earth system away from the building at a location where the ground stays wet throughout the year.
- 7 Check your earth system at the time of installation and later on at least once a year preferably during a dry period.
- 8 Protect your energiser against damage from a surge through the mains by installing a surge protector plug.
- 9 Mark your fence by placing suitable warning signs.

Warning: Do not use a cable reel outdoors to connect the energiser to the mains system.

PATURA 230V MAINS ENERGISERS

REF	DESCRIPTION	JOULES	CODE
P1000	Greatest value for money amongst 230V energisers; for short fences for cattle, horses and domestic animals; energiser monitoring indicator.	0.75	P141000

PATURA energisers comply with all obligatory standards

Solar power, the environmentally friendly energy

By means of the progressing and proven technology in the area of solar panels, the sun is rapidly becoming a source of cheap energy for electric fences, too. The costs are restricted to a one-time acquisition of a solar panel. There are no further maintenance or follow-up costs. Given correct dimensioning, PATURA solar installations are designed to run an electric fence installation, maintenance free, from spring through to autumn. If the energisers are switched down to a lower power level, this maintenance-free operation can be continued through into the winter.

- Polycrystalline cells for highest energy efficiency
- 5 year efficiency warranty for all solar panels
- All solar panels with integrated charge regulator
- Universal bracket allows mounting on all energisers, onto posts and on walls

Universal bracket made from aluminium

PORTABLE SOLAR POWER ENERGISERS

Suggestions of places to site your Solar Powered Energiser

Solar powered energisers with built in solar cells. A low-cost solution for powering fences in areas where mains power is not easily available.

PORTABLE SOLAR POWERED ENERGISERS

REF	DESCRIPTION	JOULES	CODE
P25 Solar Low Power	Energiser with integrated 1.0W solar panel and 6V/4Ah gel-cell battery; ideal for short fences. Max fence length (no vegetation): 800m. Max fence length (little vegetation): 200m.	0.06	P140300
P35 Solar Medium Power	Energiser with integrated 2.6W solar panel and 12V/7Ah gel-cell battery; ideal for small cattle and horse pastures. Max fence length (no vegetation): 1600m. Max fence length (little vegetation): 600m	0.21	P140400
P70 Solar High Power	Energiser with integrated 2.6W solar panel and 12V/7Ah gel-cell battery; ideal for cattle and horse pastures. Max fence length (no vegetation): 4000m. Max fence length (little vegetation): 2000m.	0.64	P140600

USE 2.5MM LEAD-OUT CABLE TO CONNECT SOLAR ENERGISER TO FENCE - SEE PAGE 318

EARTH STAKE WITH STAINLESS STEEL SCREW

DESCRIPTION	CODE
2m earth stake can be used to double as support stand for solar power energisers. Drive 500mm into soil and mount energiser onto the T-post profile.	P161802

SOLAR PANELS

WATT	DESCRIPTION	CODE
15W	With universal mounting bracket for P100, P200 and P1500.	P148421

MORE DETAILS ON THIS KIT AND OTHER TYPES ARE AVAILABLE ON REQUEST.

PAC DOG ELECTRONIC FENCE SYSTEM

The ultimate choice for an invisible fence

This system is ideal in an environment where you wish to contain one or more dogs without using ugly and obtrusive fencing. Any number of dogs, each wearing an active Collar Unit can be contained. The collar detects a short-range radio signal radiated from a low-cost, plastic covered loop-wire, that bounds the designated area. This wire can either be lightly buried below ground; laid on the surface; tacked to an existing fence; or threaded through bushes and hedges. This wire loop has a notional maximum length of 1500 metres at 1.5mm² gauge or 3000 metres at 2.5mm² gauge.

PAC DOG ELECTRONIC FENCE SYSTEM

DESCRIPTION	CODE
Electric PAC Dog Kit (F200A)	PF200A
Additional PAC Dog Kit Wire (100m)	PFWIRE
Extra Rechargeable Dog Fence Collar	PF5C

PAC DOG REMOTE TRAINER KIT

Remote hand-held trainer

This trainer kit retains its leadership in the specialist field of Dog Control systems. The handler's ability to communicate with his dog at longer distances will give him the added confidence to enable even greater freedom from the lead. It has a long range control of up to 1000 metres from an ultra high frequency hand set.

PAC DOG REMOTE TRAINER KIT

WIRES FOR PERMANENT FENCING

PLAIN STEEL WIRE (5KG COIL)

DESCRIPTION	CODE
Ø 1.8mm galvanised, 5kg = approx. 250m	P109100
Ø 1.6mm galvanised, 5kg = approx. 315m	P109000

TORNADO STEEL WIRE (25KG)

Patura Tornado steel wire has a special thick galvanised coating of 95% zinc and 5% aluminium, giving a life which is 9 times that of normal galvanised wire and 3 times as long as normal thick galvanised wire. The retention of the zinc coating on the wire is markedly improved by combination with the aluminium.

DESCRIPTION	CODE
Ø 1.6mm, 25kg coil = approx. 1575m	P191610
Ø 2.5mm = very high tensile strength. 25kg coil = approx. 625m	P190000

Use with permanent insulators P168325

HIPPOWIRE

Unique: 4 conductors for optimum security

PATURA HIPPOWIRE: THE BETTER ALTERNATIVE The best visibility, optimum conductivity, minimal risk of injury and a long life - the Patura Hippowire meets all those demands with 2.5mm steel wire sheathed in conductive plastic. The steel wire core ensures the best conductivity, the thick plastic sheathing offers good visibility and the lowest risk of injury, while the 4 black conducting portions ensure that the current is best passed to the animal.

DESCRIPTION	CODE
304m roll, white	P190400
304m roll, brown	P190410

With conductive plastic coating, approx. 7mm Ø

STRANDED WIRE

Galvanised stranded metal; Ø1.5mm

DESCRIPTION	CODE
200m coil	P108100
500m coil	P108200

ALUMINIUM WIRE

Very high conductivity, 4 times lighter than normal plain steel wire. Tip: these wires only require a lightweight tension up to 20kg which can be easily reached by hand.

DESCRIPTION	CODE
Ø 1.8mm, 400m roll	P191700
Ø 2.0mm, 400m roll	P191800

This product is particularly suitable for fences used to deter wildlife as wires can be installed close to the ground.

CHOOSING YOUR POLYWIRE AND ROPE

Conductivity of the fence wiring

Long lengths of electric fence can only function using fence wiring with good conductivity. When using 4 wires of 2.5mm steel, fences up to 120km can be considered when there is no vegetation. using only one wire of the same, the maximum length drops to 30km.

If you go down to one compact-polywire that has 6 x Ø 0.20mm stainless steel strands, the maximum length of fence goes down to 250m. If there is vegetation at the fence, then these figures drop considerably. The fence wire must be carefully selected depending on the desired fence length and the anticipated vegetation growth.

In longer fence lengths, only high conductivity fence wires ensure maximum performance to the end of the fence.

POLYWIRE

Fence Voltage	after 100 m	after 1 km	after 3 km
Standard Polywire 3 x 0.16	2100 V	300 V	100 V
Compact Polywire 6 x 0.20	4200 V	800 V	300 V
Tornado Polywire 1 x 0.30 + 5 x 0.20 Tornado Polywire	7700 V	5500 V	3400 V
Tornado XL Polywire 3 x 0.30 + 8 x 0.20	7900 V	6900 V	5500 V
Tornado XXL Polywire 3 x 0.30 + 6 x 0.20 Tornado XXL Polywire	7900 V	6900 V	5500 V

PATURA Tornado: MAXIMUM CONDUCTIVITY FOR THE HIGHEST SECURITY

Extremely strong and conductive, thanks to a combination of stainless steel and copper strands. Stainless steel strands are very durable and copper strands are very conductive, which results in an highly effective product - able to cope with long fences in the most challenging conditions!

POLYROPE

Fence Voltage	after 100 m	after 1 km	after 3 km

POLYTAPE

THE DEMANDS FOR POLYTAPE The most important criteria in the assessment of a polytape are its conductivity, its mechanical strength and particularly for horses, its visibility. Narrow tapes offer the possibility for simple rolling up combined with low weight and higher flexibility. Broad tapes offer the optimum visibility for permanent fences. For optimum longevity and resistance to wind and weather, they require correct erection using high quality accessories.

ROPE JOINER FOR POLYROPE

For secure connection of all polyrope up to 6mm. Pack type: hanging card.

DESCRIPTION	QTY	CODE
Galvanised	5	P103205
Stainless steel	5	P103903

OFFSET INSULATORS

Increase the life of your fences

Patura offers the possibility of allowing old conventional fences to provide effective animal control for many years to come. New non-electric fences have when equipped with offsets, almost twice the longevity. Insulators on offsets can be fixed to 2 horizontal wires of a fence, or attached directly to the post. The live wire runs inside the actual fence. On level land the offsets can be spaced at up to 8m apart.

OFFSET BRACKET WITH PORCELAIN INSULATOR

Porcelain insulator with offset bracket for insertion into existing fence wires or for stapling onto posts; length 300mm.

PACK QTY	CODE
10	P166010

RING INSULATOR WITH LONG SHAFT

Wood screw thread; length of shaft 200mm; for polywires and polyropes.

PACK QTY	CODE
10	P101610

ROPE AND TAPE INSULATOR WITH LONG SHAFT

Length of shaft 180mm; for polytapes up to 20mm and polyrope.

DESCRIPTION	PACK QTY	CODE
With metric thread M6.	10	P127710
With wood screw thread.	10	P127410

ROPE AND TAPE INSULATOR WITH LONG SHAFT (40MM TAPE)

Length of shaft 180mm; for polytapes up to 40mm and polyrope.

DESCRIPTION	PACK QTY	CODE
With wood screw thread.	10	P127910

OFFSET PIGTAIL INSULATOR

Offset insulator made of round bar steel with an insulated loop; can also be used for polytape up to 40mm: length 25cm and 40cm for nailing directly onto wooden posts (secure additionally with 1 staple) secure offset insulator with at least 2 staples when installed on top of post.

ELECTRIC FENCE NETTING

PATURA electric fence netting, quick and easy fences

PATURA electric fence nets have flexible vertical connecting wires, which are not electrified and are securely connected to the horizontal wires by firmly welded joints.

PATURA netting - 3 distinctive advantages:

- ① Clip for optimum connection
- ② Double spike for easy ground insertion
- ③ Firmly welded joints

Note: Each net includes extra ground pegs and repair kit.

ELECTRIC FENCE NETTING

DESCRIPTION

DESCRIPTION	CODE
90cm high, with single spike, 50m	P108900
90cm high, with double spike, 50m	P109200
106cm high, with double spike, 50m	P110600

Electric fence netting 0.90 m:

14 posts with double spikes, 8 horizontal polywire, of which the top 7 carry current (top wire is 6 x 0.20 mm stainless steel strands, the lower 6 each have 3 x 0.20 mm stainless steel strands).

Resistance: 1.4 ohms/m

CODE P109200

Electric fence netting 1.06 m:

14 posts with double spikes, 8 horizontal polywire, of which the top 7 carry current (top wire is 6 x 0.20 mm stainless steel strands, the lower 6 each have 3 x 0.20 mm stainless steel strands).

Resistance: 1.4 ohms/m

CODE P110600

Double spike enables easy tread-in to hard ground

TORNADO XL ELECTRIC FENCE NETTING

Tornado XL netting has more copper strands for greater conductivity and enhanced performance.

DESCRIPTION

DESCRIPTION	CODE
90cm high, with double spike, 50m	P109250

ELECTRIC FENCING GATES

Gates in the Fence – 5 basic rules

1. Keep the number of gates to a minimum, as gates are always a weak point in the fence.
2. If possible, ensure that the gate is on level ground, as the gate area is always endangered by erosion.
3. You will simplify the fence construction by putting the gates in the preferred corner areas.
4. Never run the current through gate itself from one side to the other, rather use high voltage cable to pass it under the gate.
5. Do not use spring gate sets in horse fences.

GATEWAY SETS

Spring gate set – the practical gate

A spring gate set consists of 4 parts: the gate handle, gate handle insulator, gate tensioning spring and the insulator for attaching the spring. Patura spring gate sets contain an especially large spring and are suitable for all gate widths from 3 to 5 metres. In the opened condition the spring carries no current, contracts to about 25cm and hangs down, with the handle from the gatepost. To shut the gate, the gate handle and spring are attached to the gate insulator on the other side of the gate. From here, the gate handle and spring obtain the current.

SPRING GATE SET

DESCRIPTION	CODE
Standard, galvanised	P164001

You can drive onto the pasture without getting out of your vehicle

ELECTRICAL DRIVE THROUGH GATES

With the electrical drive-through gate it is possible to achieve easy access at frequently travelled entryways.

Without an extra person it is possible to drive onto the pasture without the risk of animals escaping.

- Set always consists of 2 rods and 2 hinges
- Flexible fiberglass rod covered with conductive rubber
- Insulated handle for manual operation
- The gate opens in both directions and it closes again by itself
- Can be locked in place while open

Simple to fit.

ELECTRICAL DRIVE THROUGH GATE

Consists of 2 conductive fibreglass rods, 2 hinges and insulated connecting cable; the stated width corresponds to the road width.

ALARM DEVICES FOR FENCE MANAGEMENT

At last, the reliable, complete and comfortable supervision of remote pastures is possible. With the assistance of modern mobile phone technology, every alarm signal can now be transmitted to a mobile, and/or landline telephone. All you need is a SIM-card of your choice, and the mobile alarm transmitter unit will dial into all the usual GSM networks.

Schematic showing the monitoring of an electric fence system powered by batteries (with an optional solar panel) – within minutes the electric fence alarm will be transmitted from the most remote paddock to the mobile and/or landline telephone.

EFFECTIVE ANIMAL CONTROL WITH ELECTRIC FENCING

To maintain the safety of electric fences and to meet legal requirements, the operator is obliged to consider the following points:

1. The fence voltage must be at least 2000 volts at every point on the fence. PATURA recommendation: 3000 volts.
2. This is to be monitored regularly through daily measurements of the fence voltage.
3. This presupposes the presence of appropriate testing devices such as a fence tester, a digital voltmeter, a fence compass, a fence alert or a separate alarm system for an electric fence.
4. For difficult or long haired animals a fence voltage of 4000 volts is recommended.
5. Energisers with adequate power (output power) to meet the above mentioned demands, even when there are losses due to vegetation on the fence, must be installed.
6. The fence and/or the fencing material should comply with the common level of technology.
7. Depending on the fence length, fence wiring with good conductivity should be used.
8. An appropriate fence height and/or number of wires should be allowed for, depending on risk potential and animal species.

ALARM MONITOR

DESCRIPTION

In the event of a drop in the fence voltage or a broken wire, an optical and an acoustic signal are generated; the voltage at which this occurs can be pre-set; connection for external alarm transmitters; for both mains and battery energisers. Power supply by 12V battery or mains adaptor (order separately: mains adaptor ref. P150220).

CODE

P156001

NEW

GSM - ELECTRIC FENCING ALARM

DESCRIPTION

Mobile alarm transmitter unit with built-in fence voltage evaluation; infinitely variable trigger voltage; turning the fence on or off via SMS; control of battery voltage; battery supply (type AA/LR6/AM-3); suitable for mains (230V AC) and battery energisers (12V DC); order mains adaptor separately

CODE

P156305

GSM network must be accessible. SIM card not supplied.

AUTOMATIC TELEPHONE DIALING UNIT

DESCRIPTION

For direct connection to the adjoining alarm monitor; automatically dials up to 6 preprogrammed telephone numbers; powered by 12V battery/ mains adaptor (order separately: mains adaptor ref. P150210).

CODE

P156202

Conventional telephone connection must be available.

SIREN FOR ALARM MONITOR

DESCRIPTION

For attachment to the Patura alarm monitor (ref. P156001); 12V, 120dB. P156901

CODE

P156901

ALARM FLASHLIGHT

DESCRIPTION

For attachment to the Patura alarm monitor (ref. P156001); 12V.

CODE

P156801

WARNING LIGHTS & FENCE TESTERS

All known digital voltmeters only measure the fence voltage without an animal touching the fence. Only the new PATURA digital voltmeter will show you the very important voltage simulating animal contact. Only if this voltage is above 2000 volts will your animals receive a reasonable shock.

Fence Alert

The Fence Alert is firmly installed into the electric fence, and provides an alarm by means of a bright red flashing light as soon as the voltage falls to a pre-determined level. There are two trigger levels to choose from. The Fence Alert needs no earth connection. It is powered by a built-in battery.

Place your Fence Alert at a place where you pass by regularly. If there is no or too little voltage on the fence, the fence alert is flashing red or the flashlight goes off. Install several Fence Alerts at critical points across your paddocks.

FENCE ALERT

DESCRIPTION

Shows you by means of a flashing light if your fence voltage has fallen too far; visible from up to 1.5km; two trigger levels; simply hung onto the wire, polywire or polyrope.

CODE

P150401

FENCE FLASHER

DESCRIPTION

Hook flashlight onto wire and connect leads to fence and earth. Light will flash provided the power is in excess of 3000V. Serves to also deter wildlife as well as a voltage indicator.

CODE

P150510

FENCE TESTERS

FENCE COMPASS

DESCRIPTION

Digital voltmeter with ammeter for exact failure analysis on an electric fence; illuminated LCD display, audible indicator if there is voltage on fence; ideal for use on wire, limited use on polywire, not suitable for polyrope or polytape.

CODE

P150901

DIGITAL VOLTMETER

DESCRIPTION

The ideal measuring equipment with earth stake and fence contacts; digital display; essential for the monitoring of electric fences, their earthing, for fault finding and for checking equipment; with integrated activatable load resistor to simulate animal contact.

CODE

P150302

FENCE TESTER (8 LEVELS)

DESCRIPTION

Essential for daily fence monitoring; shows the condition of your fence in eight stages (1000 to 8000V); complete with connecting cable and earth stake.

CODE

P150002

NEW

WIRELESS FENCE TESTER (5 LEVELS)

DESCRIPTION

This is the simple and inexpensive way to check the condition of your fence without an earth stake. Powerful LED lights monitor in 5 stages the current voltage on your fence. Complete with 9V block battery.

CODE

P150003

LIGHTNING PROTECTION, SWITCHES AND SIGNS

Lightning Protection Systems

International standard requirements:

"Energisers for the operation of electric fence installations on pasture land may not be installed in buildings that are susceptible to fire such as barns, hay lofts and stables. To protect against lightning damage, a lightning protection system (spark gap with earthing) must be built into the fence lead-out before the introduction of that lead out cable into the building".

WARNING SIGN

DESCRIPTION

Caution: Electric Fence! International standards require that warning signs be placed at clearly visible points 50m apart, at junctions with byways, as well as at points where the existence of an electric fence would not be expected. Plastic printed both sides.

CODE

P160001

LIGHTNING DIVERTER

DESCRIPTION

For mounting on a wall or fence post; protects your energiser by leading the lightning to the ground; required by international standards where energisers are installed indoors; order earth stakes and connecting cable separately.

CODE

P164801

CUTOUT SWITCH

DESCRIPTION

For switching the current on and off independently of the energiser and for switching individual paddocks on or off.

CODE

P160701

TWO-CIRCUIT FENCE SWITCH

DESCRIPTION

To turn on and switch between two fence systems with one switch.

Four positions are possible:
 '0': both fences are turned off.
 'I': Fence 1 is turned on.
 'II': Fence 2 is turned on.
 'I+II': both fences are turned on.

CODE

P160702

WIRE STRAINERS AND TENSIONERS

WIRE STRAINER WITH LOCK

To tighten wires.

PACK TYPE	QTY	CODE
Hanging card	1	P164600
Hanging card	10	P164602

WIRE STRAINER WITH INSULATOR

To tighten live wires easily and securely.

PACK TYPE	QTY	CODE
Hanging card	1	P164610
Box outer	10	P164612

WIRE STRAINER WITH INSULATOR AND ROPE

DESCRIPTION	CODE
To easily tighten and fasten live wires to tension posts up to 20cm diameter. No special knots need to be tied into the wire. Loop wire rope around strainer post and pass strainer through hoop to tie off. Secure with staples.	P164621

NEW

TENSION HANDLE FOR WIRE STRAINER

DESCRIPTION	CODE
For easy tensioning of wire strainers	P164630

TWIST-TIGHT WIRE TENSIONER

DESCRIPTION	CODE
Rotating tensioner for polyrope and polywire; plastic, black.	P164506

TENSION SPRING

By adding this spring mechanism to your fence you will reduce the load at the corners and provide for fluctuations in the tension of the fence regardless of air temperature. This product is often used with aluminium wire and narrow gauge wires <1.6mm. For heavier wires <2.5mm use larger model.

DESCRIPTION	CODE
Light duty model for wires <1.6mm.	P162600
Heavy duty model for wires <2.5mm.	P162700

SAFETY COVER FOR TENSION SPRING

DESCRIPTION	QTY	CODE
Prevents horses tails becoming caught in tension springs	3	P162903

PATURA rotating wire tensioner: The clever way to tighten wires

PATURA's rotating wire tensioner enables you to easily tighten wires without cutting them. The tensioner is inserted in the wire at any place on the fence, the wire tensioning handle is attached and the tensioner is turned around its own axle until the correct fence tension is reached. Then the cotter pin is installed and the wire tensioner handle is removed. If necessary, the wire can be retightened and/or relaxed, at any time. Rotating wire tensioners must be installed in every section of the fence.

ROTATING WIRE TENSIONER

Allows rapid tensioning and detensioning of wires and rope without cutting them. Aluminium.

PACK TYPE	QTY	CODE
Hanging card	3	P164303
Box outer	25	P164325

WIRE TENSIONER HANDLE

DESCRIPTION	CODE
For operating the rotating wire tensioner, galvanised.	P644000

WIRE TENSIONERS WITH HANDLE

DESCRIPTION	CODE
6 x rotating tensioners and 1 x tensioner handle.	P644001

Insert the rotating wire tensioner in the wire, attach the wire tensioner handle

Turn the wire tensioner handle until the correct fence tension is reached

Hang the wire tensioner handle in the wire, install the cotter pin and remove the wire tensioner handle.

Due to the light weight, the wire tensioner hangs lightly in the wire.

TOOLS

PROFESSIONAL ELECTRIC FENCING PLIERS

DESCRIPTION

Rugged insulated pliers; heavy duty model with hammer, parallel clamping jaws and special wire cutter for steel wire.

CODE

P522001

ELECTRIC FENCING PLIERS

DESCRIPTION

Traditional fencing pliers with hammer and wire cutter

CODE

P152201

TENSIONING GUN FOR GRIPPLES

DESCRIPTION

For tensioning wire.

Best
Product

SPINNING JENNY WIRE DISPENSER

DESCRIPTION

For the simple rolling up of steel wire, horse wire and plain steel wire; with base to allow direct insertion into the ground.

CODE

6600003

SCREW ADAPTOR FOR RING INSULATORS

DESCRIPTION

For the easy screwing in of ring insulators in softwood posts using an electric screwdriver.

CODE

P158901

ISOFLOTT

DESCRIPTION

Insulator spinner for easy screw-in of ring and slotted insulators in softwood posts using an electric screwdriver.

CODE

P159000

MAKING THE RIGHT CONNECTIONS

Along with solar panels, rechargeable batteries are the most environmentally friendly alternative for providing the power for electric fences where there is no mains connection. All 9 V PATURA battery energisers can be powered by a 12 V rechargeable battery. Use rechargeable batteries to supply your electric fences and make a valuable contribution to the environment. Up to 95 % of the materials used in the manufacture of rechargeable batteries can be recycled, whereas the typical 9 V electric fence battery is a disposable item.

The constant voltage supply of PATURA alkaline batteries provides full energiser performance until the very last day.

By the use of the right battery you get longer use from them and thus make a contribution in preventing waste batteries.

PATURA 9 V alkaline electric fence battery

PATURA alkaline batteries have a high constant voltage supply through-out their life. Thus it can be assured that throughout this time the energiser will always provide a constant output to the fence. In comparison with a zinc-carbon battery of the same capacity there is more energy stored (see figure). PATURA alkaline batteries contain neither mercury nor cadmium. Suitable for storage up to 3 years.

PATURA 12 V glass mat batteries

Starter batteries for cars or trucks have decisive disadvantages if used to power energisers. They have a high self-discharge, and are only cycle proof to a small degree. i.e., they will stand for markedly fewer charge-discharge cycles. PATURA glass mat batteries for 12 V energisers and solar installations are totally maintenance-free and function independent from locations. They have a low self-discharge and are especially cyclic proof.

THE CORRECT USE OF BATTERIES

9 Volt:

All 9 V dry batteries are air-oxygen batteries, i.e. they need oxygen to produce energy.

- Before use be sure to remove the stickers which are covering the air breathers.
- If taking the battery out of service for an extended period, seal the air breathers again and store the battery in a cool dry place. (Thus self-discharge is prevented).

12 Volt:

Correct handling is important for extending the life of rechargeable batteries.

- Standard/special batteries are dry charged, and require to be filled with normal trade-standard battery acid before use.
- Recharge batteries in due time, and always recharge them fully.
- Never over-charge batteries (use an automatic battery charger)
- With standard/special batteries check the acid level every 4 weeks or so and top up with distilled water as required.
- If taking the battery out of service for an extended period, charge the battery fully, then top up the charge after 8 weeks.

Capacity of batteries

How long does my 12 V battery last?

- We state the capacity of all our rechargeable batteries based on 100 hours standard discharge. A battery is completely discharged after 100 hours and the extracted capacity is determined: This is referred to as capacity C100
- Calculation of battery life:
 1. Usable capacity = nominal capacity x 65 % e.g. 80 Ah x 65 % = 52 Ah
 2. Current consumption energiser: e.g. 0.125 A
 3. Operation period (hours) = capacity/current consumption.
i.e. 52 Ah/0.125 A = 416 hours

Practical tips in the use of 12 V batteries

- Buy 2 small batteries (e.g. 12 V / 45 Ah) rather than one large one.
- For charging, use the 12 V – 2.5 A automatic battery charger.
- Always leave one battery attached to the charger, so that it is always charged.
- Change the battery in the energiser as soon as the battery indicator lights illuminate.
- The battery will reward you by providing a long life, and thus saving you money.

Note: All 12 V lead batteries can suffer from deep discharge due to conventional energisers, which can lead to the destruction of the battery. PATURA energisers with built-in deep discharge protection reliably prevent this.

BATTERIES

Batteries for use with battery powered energisers. Rechargeable and non-rechargeable versions available.

Glass mat battery
leakproof – maintenance-free
no acid necessary
ready to use

Rechargeable

SUPER GLASS MAT BATTERY (12V)

The ideal maintenance free battery, which will operate in any position; for all 9V energisers which will also operate on 12V. Dimensions (LxWxH) 166x175x125mm; 8.9kg.

SPECIFICATION	CODE

9V/200Ah	P192000

SPECIAL BATTERY FOR ENERGISERS (9V)

Zinc-carbon battery for energisers.

SPECIFICATION	CODE
9V/55Ah	P151200
9V/90Ah	P151300
9V/130Ah	P151400

Make sure you earth everything properly!

Over 80% of installed earthing systems are inadequate. The minimum number of earth stakes for each particular energiser is given in the tables for the particular energisers.

Most installations only require 1 or 2 earth stakes. Keep area moist for effective earthing.

EARTH STAKES – THE KEY ACCESSORY

Monitoring the earth

If the earth system of an energiser is inadequate, current can be measured between the earth stake and the surrounding soil or an electric shock can be felt when touching the earth system. The earthing system of an energiser should be checked at the time of installation and at least once a year with permanently installed energisers (preferably during dry soil conditions).

TEST PROCEDURE

- Short circuit the fence by putting steel posts into the ground approximately 100 m away from the energiser, and lay them against the fence wires. This should lower the fence voltage to 2000 volts.
- Use a digital voltmeter and insert its earth probe into the ground approx. 1m away from the energiser's last earth stake. Touch the energiser's last earth stake with the measurement contact of the digital voltmeter.
- The digital voltmeter indicates the earth voltage when the energiser is switched on:
- 0 to 200 volts (0.2 kV to 0.6 kV display): The earthing is perfect
- 200 to 600 V (0.2 kV to 0.6 kV display): The earthing is still acceptable
- Over 600 volts: The earthing needs to be improved by adding more and, if necessary, longer earth stakes, thereby increasing the fence voltage and the safety of the fence.

SPARE EARTH STAKE

Additional earth stake especially for small battery energisers; galvanised, 0.65cm long, with handle for easy extraction and 3m cable with 3mm probe connector.

CODE

P161700

EARTH STAKE WITH STAINLESS STEEL SCREW

Galvanised T-angle iron, with stainless steel screw for attaching the earth connection.

2.0m	P161802

CABLES AND CONNECTORS

Practical tip:

Never use domestic copper cables for connection in the electric fence area. Electrochemical corrosion takes place between copper and steel fence wires, which eats into the connection and impedes the current flow. Apart from that, such cables are not cleared for high voltage.

Underground cable and lead-out cable

Patura high voltage electric fence cable is double insulated and high voltage safe to over 10,000V. It can be used for over and underground lead outs, for the connection of earth stakes and for carrying current past gates. For distances up to 50m the 1.6mm diameter version is sufficient. For distances over 50m the strong, high conductivity 2.5mm cable should be used.

CONNECTOR FOR HIGH VOLTAGE CABLE

For waterproof connection of electric fence high voltage cable diameter 1.6mm - 2.7mm.

CODE

P160810

Other joiners also suitable for connecting High Voltage cable to the fence (above ground only). See page 322.

Polywire Joiner

Joint Clamp

Joint Screw

HIGH VOLTAGE CABLE 1.6MM (LEAD-OUT)

High voltage, double insulated, single core cable with 1.6mm steel core; for fence and earth lead outs up to 50m, or for by-passing gates; resistance 0.1ohms/m.

LENGTH

ELECTRICAL CONNECTIONS

ON ELECTRIC FENCE WE DIFFERENTIATE IN PRINCIPLE BETWEEN TWO TYPES OF CONNECTION:

- THE **CROSS-CONNECTION** BETWEEN TWO WIRES
- THE **IN-LINE CONNECTION** OF THE WIRE ITSELF

MAKING THE RIGHT CONNECTIONS

CROSS-CONNECTIONS

Connection cable

The electrical connections on an electric fence take on a special meaning. A bad connection can mean that there is no trace of a shock beyond the connection – or only a very reduced one. All connections on an electric fence must have tight contact. Only stainless steel clamps should be used. Any rust at a connection acts as an insulator, that is, the current flow is impeded and the fence voltage drops.

**CONNECTION CABLES
AVAILABLE FOR WIRE,
ROPE AND TAPE
SEE PAGES 320-321**

For each fence wire material we offer the proper connection technology. All connections must be implemented with high contact pressure. This is ensured with springs or clamping screws. The use of stainless steel Patura cables ensures permanent conductive connections.

Fence connection cable with spring-loaded clamps (SS) provides optimum cross-connections for temporary polywire fences.

Fence connection cable - polyrope - with (SS) polyrope clamp provides optimum cross-connections for temporary polyrope fences.

Fence connection cable - polytape - with (SS) connector plates provides optimum cross-connections for temporary polytape fences.

CROSS-CONNECTIONS

CONNECTING CABLES AND LEAD SETS

FENCE CONNECTING CABLE

With insulated spring clamps and stainless steel contacts; for quick wire connection with multi-wire temporary fences.

NOTES

Terms and Conditions

1. INTERPRETATION

1.1 Definitions. In these Conditions, the following definitions apply:

Business Day	a day [other than a Saturday, Sunday or public holiday] when banks in London are open for business.
Conditions	the terms and conditions set out in this document as amended from time to time in accordance with clause 11.6.
Contract	the contract between the Supplier and the Customer for the sale and purchase of the Goods in accordance with these Conditions.
Customer	the person or firm who purchases the Goods from the Supplier.
Force Majeure Event	has the meaning given in clause 10.
Goods	the goods (or any part of them) set out in the Order.
Order	the Customer's order for the Goods, as set out in the Customer's written acceptance of the Supplier's quotation, or overleaf, as the case may be.
Specification	any specification for the Goods, including any related plans and drawings, that is agreed in writing by the Customer and the Supplier.
Supplier	Birkdale Sales Limited (registered in England and Wales with company number 05547795).

1.2 Construction. In these Conditions, the following rules apply:

- (a) A **person** includes a natural person, corporate or unincorporated body (whether or not having separate legal personality).
- (b) A reference to a party includes its personal representatives, successors or permitted assigns.
- (c) A reference to a statute or statutory provision is a reference to such statute or provision as amended or re-enacted. A reference to a statute or statutory provision includes any subordinate legislation made under that statute or statutory provision, as amended or re-enacted.
- (d) Any phrase introduced by the terms **including**, **include**, **in particular** or any similar expression shall be construed as illustrative and shall not limit the sense of the words preceding those terms.
- (e) A reference to **writing** or **written** includes faxes and e-mails.

2. BASIS OF CONTRACT

- 2.1 These Conditions apply to the Contract to the exclusion of any other terms that the Customer seeks to impose or incorporate, or which are implied by trade, custom, practice or course of dealing.
- 2.2 The Order constitutes an offer by the Customer to purchase the Goods in accordance with these Conditions. The Customer is responsible for ensuring that the terms of the Order and any applicable Specification are complete and accurate.
- 2.3 The Order shall only be deemed to be accepted when the Supplier issues a written acceptance of the Order or commences performance of the Contract by delivering the Goods at which point the Contract shall come into existence.
- 2.4 The Contract constitutes the entire agreement between the parties. The Customer acknowledges that it has not relied on any statement, promise, representation, assurance or warranty made or given by or on behalf of the Supplier which is not set out in the Contract.
- 2.5 Any samples, drawings, descriptive matter, or advertising produced by the Supplier and any descriptions or illustrations contained in the Supplier's catalogues or brochures are produced for the sole purpose of giving an approximate idea of the Goods described in them. They shall not form part of the Contract or have any contractual force.
- 2.6 A quotation for the Goods given by the Supplier shall not constitute an offer. A quotation shall only be valid for a period of 30 Business Days from its date of issue.

3. GOODS

- 3.1 The Goods are described in the Supplier's catalogue as modified by any applicable Specification.
- 3.2 To the extent that the Goods are to be manufactured in accordance with a Specification supplied by the Customer, the Customer shall indemnify the Supplier against all liabilities, costs, expenses, damages and losses (including any direct, indirect or consequential losses, loss of profit, loss of reputation and all interest, penalties and legal and other professional costs and expenses) suffered or incurred by the Supplier in connection with any claim made against the Supplier for actual or alleged infringement of a third party's intellectual property rights arising out of or in connection with the Supplier's use of the Specification. This clause 3.2 shall survive termination of the Contract.
- 3.3 The Supplier reserves the right to amend the specification of the Goods if required by any applicable statutory or regulatory requirements.

4. DELIVERY

- 4.1 The Supplier shall ensure that:
 - (a) each delivery of the Goods is accompanied by a delivery note which shows the date of the Order, all relevant Customer and Supplier reference numbers, the type and quantity of the Goods (including the code number of the Goods, where applicable), special storage instructions (if any) and, if the Order is being delivered by instalments, the outstanding balance of Goods remaining to be delivered; and
 - (b) if the Supplier requires the Customer to return any packaging materials to the Supplier, that fact is clearly stated on the delivery note. The Customer shall make any such packaging materials available for collection at such times as the Supplier shall reasonably request. Returns of packaging materials shall be at the Supplier's expense.
- 4.2 The Supplier shall deliver the Goods to the location set out in the Order or such other location as the parties may agree (**Delivery Location**) at any time after the Supplier notifies the Customer that the Goods are ready.
- 4.3 Delivery of the Goods shall be completed on the Goods' arrival at the Delivery Location.
- 4.4 Any dates quoted for delivery are approximate only, and the time of delivery is not of the essence. The Supplier shall not be liable for any delay in delivery of the Goods that is caused by a Force Majeure Event or the Customer's failure to provide the Supplier with adequate delivery instructions or any other instructions that are relevant to the supply of the Goods.
- 4.5 If the Supplier fails to deliver the Goods, its liability shall be limited to the costs and expenses incurred by the Customer in obtaining replacement goods of similar description and quality in the cheapest market available, less the price of the Goods. The Supplier shall have no liability for any failure to deliver the Goods to the extent that such failure is caused by a Force Majeure Event or the Customer's failure to provide the Supplier with adequate delivery instructions or any other instructions that are relevant to the supply of the Goods.
- 4.6 If the Customer fails to take delivery of the Goods within three Business Days of the Supplier notifying the Customer that the Goods are ready, then, except where such failure or delay is caused by a Force Majeure Event or the Supplier's failure to comply with its obligations under the Contract:

- (a) delivery of the Goods shall be deemed to have been completed at 9.00 am on the third Business Day after the day on which the Supplier notified the Customer that the Goods were ready; and
- (b) the Supplier shall store the Goods until delivery takes place, and charge the Customer for all related costs and expenses (including insurance).

- 4.7 If 10 Business Days after the day on which the Supplier notified the Customer that the Goods were ready for delivery the Customer has not accepted delivery of them, the Supplier may resell or otherwise dispose of part or all of the Goods and, after deducting reasonable storage and selling costs, account to the Customer for any excess over the price of the Goods or charge the Customer for any shortfall below the price of the Goods.
- 4.8 The Customer shall not be entitled to reject the Goods if the Supplier delivers up to and including 5% more or less than the quantity of Goods ordered.
- 4.9 The Supplier may deliver the Goods by instalments, which shall be invoiced and paid for separately. Each instalment shall constitute a separate Contract. Any delay in delivery or defect in an instalment shall not entitle the Customer to cancel any other instalment.

5. QUALITY

5.1 The Supplier warrants that on delivery the Goods shall:

- (a) conform in all material respects with their description and any applicable Specification; and
- (b) be free from material defects in design, material and workmanship.

5.2 Subject to clause 5.3, if:

- (a) the Customer gives notice in writing to the Supplier within a reasonable time of discovery that some or all of the Goods do not comply with the warranty set out in clause 5.1;
- (b) the Supplier is given a reasonable opportunity of examining such Goods;
- (c) the Customer (if asked to do so by the Supplier) returns such Goods to the Supplier's place of business at the Customer's cost;
- (d) the Supplier in its reasonable opinion having examined such Goods finds that such Goods do not comply with the warranty set out in clause 5.1,

the Supplier shall, at its option, repair or replace the defective Goods, or refund the price of the defective Goods in full.

5.3 The Supplier shall not be liable for Goods' failure to comply with the warranty set out in clause 5.1 in any of the following events:

- (a) the Customer makes any further use of such Goods after giving notice in accordance with clause 5.2;
- (b) the defect arises because the Customer failed to follow the Supplier's oral or written instructions as to the storage, commissioning, installation, use and maintenance of the Goods or (if there are none) good trade practice regarding the same;
- (c) the defect arises as a result of the Supplier following any drawing, design or Specification supplied by the Customer;
- (d) the Customer alters or repairs such Goods without the written consent of the Supplier;
- (e) the defect arises as a result of fair wear and tear, wilful damage, negligence, or abnormal storage or working conditions; or
- (f) the Goods differ from their description as a result of changes made to ensure they comply with applicable statutory or regulatory requirements.

5.4 Except as provided in this clause 5, the Supplier shall have no liability to the Customer in respect of the Goods' failure to comply with the warranty set out in clause 5.1.

5.5 The terms implied by sections 13 to 15 of the Sale of Goods Act 1979 are, to the fullest extent permitted by law, excluded from the Contract.

5.6 These Conditions shall apply to any repaired or replacement Goods supplied by the Supplier.

6. TITLE AND RISK

6.1 The risk in the Goods shall pass to the Customer on completion of delivery.

6.2 Title to the Goods shall not pass to the Customer until the earlier of:

- (a) the Supplier receives payment in full (in cash or cleared funds) for the Goods and any other goods that the Supplier has supplied to the Customer in respect of which payment has become due, in which case title to the Goods shall pass at the time of payment of all such sums; and
- (b) the Customer resells the Goods, in which case title to the Goods shall pass to the Customer at the time specified in clause 6.4.

6.3 Until title to the Goods has passed to the Customer, the Customer shall:

- (a) store the Goods separately from all other goods held by the Customer so that they remain readily identifiable as the Supplier's property;
- (b) not remove, deface or obscure any identifying mark or packaging on or relating to the Goods;
- (c) maintain the Goods in satisfactory condition and keep them insured against all risks for their full price from the date of delivery;
- (d) notify the Supplier immediately if it becomes subject to any of the events listed in clause 8.2; and
- (e) give the Supplier such information relating to the Goods as the Supplier may require from time to time.

6.4 Subject to clause 6.4, the Customer may resell or use the Goods in the ordinary course of its business (but not otherwise) before the Supplier receives payment for the Goods. However, if the Customer resells the Goods before that time:

- (a) it does so as principal and not as the Supplier's agent; and
- (b) title to the Goods shall pass from the Supplier to the Customer immediately before the time at which resale by the Customer occurs.

6.5 If before title to the Goods passes to the Customer the Customer becomes subject to any of the events listed in clause 8.2, then, without limiting any other right or remedy the Supplier may have:

- (a) the Customer's right to resell the Goods or use them in the ordinary course of its business ceases immediately; and
- (b) the Supplier may at any time:
 - (i) require the Customer to deliver up all Goods in its possession which have not been resold, or irrevocably incorporated into another product; and
 - (ii) if the Customer fails to do so promptly, enter any premises of the Customer or of any third party where the Goods are stored in order to recover them.

7. PRICE AND PAYMENT

- 7.1 The price of the Goods shall be the price set out in the Order, or, if no price is quoted, the price set out in the Supplier's published price list in force as at the date of delivery.
- 7.2 The Supplier may, by giving notice to the Customer at any time before delivery, increase the price of the Goods to reflect any increase in the cost of the Goods that is due to:
- any factor beyond the Supplier's control (including foreign exchange fluctuations, increases in taxes and duties, and increases in labour, materials and other manufacturing costs);
 - any request by the Customer to change the delivery date(s), quantities or types of Goods ordered, or the Specification; or
 - any delay caused by any instructions of the Customer or failure of the Customer to give the Supplier adequate or accurate information or instructions.
- 7.3 The price of the Goods is exclusive of the costs and charges of packaging, insurance and transport of the Goods, which shall be invoiced to the Customer.
- 7.4 The price of the Goods is exclusive of amounts in respect of value added tax (VAT). The Customer shall, on receipt of a valid VAT invoice from the Supplier, pay to the Supplier such additional amounts in respect of VAT as are chargeable on the supply of the Goods.
- 7.5 Unless otherwise agreed in writing by the Supplier (in which case clause 7.6 shall apply), payment for the Goods must be made in advance of delivery to the bank account nominated in writing by the Supplier.
- 7.6 Where the Supplier agrees to provide the Customer with extended payment terms, it shall do in writing and the Customer shall pay the invoice in full and in cleared funds by the end of the month following the date of the invoice. Payment shall be made to the bank account nominated in writing by the Supplier. Time of payment is of the essence.
- 7.7 If the Customer fails to make any payment due to the Supplier under the Contract by the due date for payment, then the Customer shall pay interest on the overdue amount at the rate of 4% per annum above Barclay Bank plc's base rate from time to time. Such interest shall accrue on a daily basis from the due date until actual payment of the overdue amount, whether before or after judgment. The Customer shall pay the interest together with the overdue amount.
- 7.8 The Customer shall pay all amounts due under the Contract in full without any set-off, counterclaim, deduction or withholding (except for any deduction or withholding required by law). The Supplier may at any time, without limiting any other rights or remedies it may have, set off any amount owing to it by the Customer against any amount payable by the Supplier to the Customer.
- ## 8. TERMINATION AND SUSPENSION
- 8.1 If the Customer becomes subject to any of the events listed in clause 8.2, the Supplier may terminate the Contract with immediate effect by giving written notice to the Customer.
- 8.2 For the purposes of clause 8.1, the relevant events are:
- the Customer suspends, or threatens to suspend, payment of its debts, or is unable to pay its debts as they fall due or admits inability to pay its debts, or (being a company or limited liability partnership) is deemed unable to pay its debts within the meaning of section 123 of the Insolvency Act 1986, or (being an individual) is deemed either unable to pay its debts or as having no reasonable prospect of so doing, in either case, within the meaning of section 268 of the Insolvency Act 1986, or (being a partnership) has any partner to whom any of the foregoing apply;
 - the Customer commences negotiations with all or any class of its creditors with a view to rescheduling any of its debts, or makes a proposal for or enters into any compromise or arrangement with its creditors other than (where the Customer is a company) where these events take place for the sole purpose of a scheme for a solvent amalgamation of the Customer with one or more other companies or the solvent reconstruction of the Customer;
 - (being a company) a petition is filed, a notice is given, a resolution is passed, or an order is made, for or in connection with the winding up of the Customer, other than for the sole purpose of a scheme for a solvent amalgamation of the Customer with one or more other companies or the solvent reconstruction of the Customer;
 - (being a company) an application is made to court, or an order is made, for the appointment of an administrator or if a notice of intention to appoint an administrator is given or if an administrator is appointed over the Customer;
 - (being a company) the holder of a qualifying floating charge over the Customer's assets has become entitled to appoint or has appointed an administrative receiver;
 - a person becomes entitled to appoint a receiver over the Customer's assets or a receiver is appointed over the Customer's assets;
 - (being an individual) the Customer is the subject of a bankruptcy petition or order;
 - a creditor or encumbrancer of the Customer attaches or takes possession of, or a distress, execution, sequestration or other such process is levied or enforced on or sued against, the whole or any part of its assets and such attachment or process is not discharged within 14 days;
 - any event occurs, or proceeding is taken, with respect to the Customer in any jurisdiction to which it is subject that has an effect equivalent or similar to any of the events mentioned in clause 8.2(a) to clause 8.2(f) (inclusive);
 - the Customer suspends, threatens to suspend, ceases or threatens to cease to carry on all or a substantial part of its business;
 - the Customer's financial position deteriorates to such an extent that in the Supplier's opinion the Customer's capability to adequately fulfil its obligations under the Contract has been placed in jeopardy; and
 - (being an individual) the Customer dies or, by reason of illness or incapacity (whether mental or physical), is incapable of managing his or her own affairs or becomes a patient under any mental health legislation.
- 8.3 Without limiting its other rights or remedies, the Supplier may suspend provision of the Goods under the Contract or any other contract between the Customer and the Supplier if the Customer becomes subject to any of the events listed in clause 8.2(a) to clause 8.2(l), or the Supplier reasonably believes that the Customer is about to become subject to any of them, or if the Customer fails to pay any amount due under this Contract on the due date for payment.
- 8.4 On termination of the Contract for any reason the Customer shall immediately pay to

the Supplier all of the Supplier's outstanding unpaid invoices and interest.

- 8.5 Termination of the Contract, however arising, shall not affect any of the parties' rights, remedies, obligations and liabilities that have accrued as at termination.
- 8.6 Clauses which expressly or by implication survive termination of the Contract shall continue in full force and effect.
- ## 9. LIMITATION OF LIABILITY
- 9.1 Nothing in these Conditions shall limit or exclude the Supplier's liability for:
- death or personal injury caused by its negligence, or the negligence of its employees, agents or subcontractors (as applicable);
 - fraud or fraudulent misrepresentation;
 - breach of the terms implied by section 12 of the Sale of Goods Act 1979; or
 - defective products under the Consumer Protection Act 1987.
- 9.2 Subject to clause 9.1:
- the Supplier shall under no circumstances whatever be liable to the Customer, whether in contract, tort (including negligence), breach of statutory duty, or otherwise, for any loss of profit, or any indirect or consequential loss arising under or in connection with the Contract; and
 - the Supplier's total liability to the Customer in respect of all other losses arising under or in connection with the Contract, whether in contract, tort (including negligence), breach of statutory duty, or otherwise, shall in no circumstances exceed the price of the Goods.
- ## 10. FORCE MAJEURE
- Neither party shall be liable for any failure or delay in performing its obligations under the Contract to the extent that such failure or delay is caused by a Force Majeure Event. A **Force Majeure Event** means any event beyond a party's reasonable control, which by its nature could not have been foreseen, or, if it could have been foreseen, was unavoidable, including strikes, lock-outs or other industrial disputes (whether involving its own workforce or a third party's), failure of energy sources or transport network, acts of God, war, terrorism, riot, civil commotion, interference by civil or military authorities, national or international calamity, armed conflict, malicious damage, breakdown of plant or machinery, nuclear, chemical or biological contamination, sonic boom, explosions, collapse of building structures, fires, floods, storms, earthquakes, loss at sea, epidemics or similar events, natural disasters or extreme adverse weather conditions, or default of suppliers or subcontractors.
- ## 11. GENERAL
- ### 11.1 Assignment and other dealings.
- The Supplier may at any time assign, transfer, mortgage, charge, subcontract or deal in any other manner with all or any of its rights or obligations under the Contract.
 - The Customer may not assign, transfer, mortgage, charge, subcontract, declare a trust over or deal in any other manner with any or all of its rights or obligations under the Contract without the prior written consent of the Supplier.
- ### 11.2 Notices.
- Any notice or other communication given to a party under or in connection with the Contract shall be in writing, addressed to that party at its registered office (if it is a company) or its principal place of business (in any other case) or such other address as that party may have specified to the other party in writing in accordance with this clause, and shall be delivered personally, sent by pre-paid first class post or other next working day delivery service, commercial courier, fax or e-mail.
 - A notice or other communication shall be deemed to have been received: if delivered personally, when left at the address referred to in clause 11.2(a); if sent by pre-paid first class post or other next working day delivery service, at 9.00 am on the second Business Day after posting; if delivered by commercial courier, on the date and at the time that the courier's delivery receipt is signed; or, if sent by fax or e-mail, one Business Day after transmission.
 - The provisions of this clause shall not apply to the service of any proceedings or other documents in any legal action.
- ### 11.3 Severance.
- If any provision or part-provision of the Contract is or becomes invalid, illegal or unenforceable, it shall be deemed modified to the minimum extent necessary to make it valid, legal and enforceable. If such modification is not possible, the relevant provision or part-provision shall be deemed deleted. Any modification to or deletion of a provision or part-provision under this clause shall not affect the validity and enforceability of the rest of the Contract.
 - If any provision or part-provision of this Contract is invalid, illegal or unenforceable, the parties shall negotiate in good faith to amend such provision so that, as amended, it is legal, valid and enforceable, and, to the greatest extent possible, achieves the intended commercial result of the original provision.
- ### 11.4 Waiver.
- A waiver of any right or remedy under the Contract or law is only effective if given in writing and shall not be deemed a waiver of any subsequent breach or default. No failure or delay by a party to exercise any right or remedy provided under the Contract or by law shall constitute a waiver of that or any other right or remedy, nor shall it prevent or restrict the further exercise of that or any other right or remedy. No single or partial exercise of such right or remedy shall prevent or restrict the further exercise of that or any other right or remedy.
- ### 11.5 Third party rights.
- A person who is not a party to the Contract shall not have any rights to enforce its terms.
- ### 11.6 Variation.
- Except as set out in these Conditions, no variation of the Contract, including the introduction of any additional terms and conditions, shall be effective unless it is in writing and signed by the Supplier.
- ### 11.7 Governing law.
- The Contract, and any dispute or claim arising out of or in connection with it or its subject matter or formation (including non-contractual disputes or claims), shall be governed by, and construed in accordance with the law of England and Wales.
- ### 11.8 Jurisdiction.
- Each party irrevocably agrees that the courts of England and Wales shall have exclusive jurisdiction to settle any dispute or claim arising out of or in connection with this Contract or its subject matter or formation (including non-contractual disputes or claims).
